

## Cache Exploration Preparing Site for Late July Drill Program at Kiyuk Lake Gold Project

**July 19, 2017, Vancouver, British Columbia:** Cache Exploration Corp. (the “Company”, or “Cache”), (TSX-V:CAY) is pleased to announce that it has staff on site preparing the Kiyuk Lake Gold Property to commence drilling in late July, 2017. Preparation will be quick as fuel, drills and a 35-person camp are on site and ready to go. Cache will be proceeding with a minimum 2,000 M drill program.

### **CEO, Jack Bal Comments:**

“With a 15 Km strike length and multiple gold showings over 3g/t we are keen to increase our already impressive data set.”

### **2017 Summer Drill Program Highlights**

1. To expand the known gold mineralization discovered at the Rusty and Gold Point zones
2. To prioritize future drill targets and develop new mineralized zones through grid till sampling and prospecting over new gold targets previously identified in property-wide till sampling

### **Rusty Zone**

Drilling at the Rusty zone will be focused on defining gold mineralization at depth and at surface to the south east. This infill drilling will help move the Rusty zone towards defining a resource. Drilling in 2013 demonstrated strong continuity of breccia-hosted gold mineralization within the Rusty zone.

Highlights from previous drilling at Rusty include:

- 52.4 m at 3.27 g/t Au from surface
- 35.9 m at 4.95 g/t Au from 134.1 m
- 61.5 m at 3.3 g/t Au from 159 m
- 24.1 m at 3.40 g/t Au from 34.0 m

### **Gold Point Zone**

The Gold Point zone is a high priority target located in a 24 kilometre magnetic anomaly that will receive further drilling in this program. Ground magnetics, prospecting and mapping in 2012 and 2013 identified a possible extension of Gold Point mineralization by the discovery of similar mineralization, in boulders, in the polymictic conglomerate that hosts the Gold Point zone. These extensional zones - South Gold Point and East Gold Point respectively - were further defined by ground magnetics as zones of magnetite destruction coincident with east-west structures, which are identical to those found at the Gold Point zone. Drilling in 2017 will target these new areas.

Previous drilling at the Gold Point zone returned:

- 63.6 m at 2.84 g/t Au from 148 m
- 12 m at 2.4 g/t Au from 120 m
- 12 m at 3.9 g/t Au from 163.5 m

### **About Cache Exploration**

Cache Exploration is focused on its Kiyuk Lake Property covering 590 square kilometers in southwest Nunavut.

### **Kiyuk Lake Property Highlights**

- A true district play covering a majority proportion of the Proterozoic Kiyuk Basin
- 12,000 meter drill database: 2008-2013
- Gold Showings over a 15 Km Strike Length
- Multiple Gold Intercepts over 1g/t
- Four Discrete Mineralized Zones (Rusty, Gold Point, Cobalt, Amundsen)
- Significant expansion possible with five new target areas identified and ready for drilling
- Sites are drill ready with fuel, drills and 35-man camp on site and ready for spring drilling

**FORWARD LOOKING STATEMENTS:** This news release contains certain forward-looking statements within the meaning of Canadian securities laws, including statements regarding the Kiyuk Lake Property: statements pertaining to the ability of Cache Exploration Inc. (“CAY”); the potential to develop resources and then further develop reserves; the anticipated economic potential of the property; the availability of capital and finance for CAY to execute its strategy going forward. Forward-looking statements are based on estimates and assumptions made by CAY in light of its experience and perception of current and expected future developments, as well as other factors that CAY believes are appropriate in the circumstances. Many factors could cause CAY’s results, performance or achievements

to differ materially from those expressed or implied by the forward looking statements, including: discrepancies between actual and estimated results from exploration and development and operating risks, dependence on early exploration stage concessions; uninsurable risks; competition; regulatory restrictions, including environmental regulatory restrictions and liability; currency fluctuations; defective title to mineral claims or property and dependence on key employees. Forward-looking statements are based on the expectations and opinions of the Company’s management on the date the statements are made. The assumptions used in the preparation of such statements, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise.
